

Illinois 4-H Signature Program Overview

Illinois Ag in the Classroom

Extension Grand Challenge: Food - Food Production

STATE CONTACT: Mark Becker (mbbecker@illinois.edu)

BRIEF DESCRIPTION: A collaboration with the Illinois Farm Bureau, ILAITC is a collection of a wide variety of activities for in-school and after-school programs focused on promoting ag literacy and a strong understanding of where our food comes from and the people and systems that are essential for agricultural systems to function. This kit will include a set of recommended standards-aligned activities that have been utilized by 4-H staff in Illinois. Delivery to youth can be conducted by 4-H staff/volunteers with the assistance of Teen Teachers.

TARGET AUDIENCE: Youth in grades from 3-8 in settings such as 4-H clubs, 4-H Federations, in-school and after-school programs and other positive youth development settings.

KEY OBJECTIVES

- Learn about plant science basics while increasing an appreciation of Illinois agriculture
- Engage high-school students in the process of leading and teaching activities to younger audiences
- Promote an understanding of basic conservation principles and how they relate to food production
- Expose young people to new and nutritious food choices
- Strengthen their understanding of where their food comes from through hands-on learning

TOOLKIT

Supported Curricular Resources –

- **IL AITC:** [Ag in the Classroom Extension Page](#)
 - Illinois Ag in the Classroom is a statewide Ag Literacy program that provides educators and students with resources to help them understand the vital role of agriculture in their lives. It is a collection of lessons and other educational resources that you can choose from in order to best fit the needs of the classroom and students you are working with.
 - Illinois 4-H has put together additional resources to accompany several lessons as developed by Myla Munro, 4-H Educator in Unit 13. To gain access to these slides, please write Mark Becker to be added to the project on Canva.

CROSS-EXTENSION, CAMPUS AND COMMUNITY COLLABORATORS

- Horticulture, Small Farms/Local Foods Educators and SNAP-Ed Educators
- Community and civic organizations
- In-School and After-School programs
- IL Farm Bureau
- AITC Coordinators

OPTIONAL PROGRAM ACTIVITIES/ EXPERIENCES

Many 4-H staff who work with this program will engage older audiences (high-school) through the Teen-Teacher model by which the high-schoolers have an opportunity to gain leadership, communication and classroom management skills by teaching IL-AITC lessons to younger audiences. Please indicate if you plan to pursue this in your registration so we can get you connected with a cohort of other 4-H staff taking this approach.

REGISTRATION

Please register at the following link: [Jot Form Signature Program Link](#)

FUNDING SUPPORT

The primary funding source made available through the State 4-H Office is to support the purchase of the curricular and material resources needed to achieve your programming goals. Groups should coordinate program expenses with their Unit Extension Office. Collaborations with local donors are also recommended where possible.

Additional funding to support programmatic costs is also available from the Food Advocacy Grants which are available several times a year through the State 4-H Office. See the following link for more information: [Gardening, Agriculture and Food Access Page](#)

Funding is also available in partnership with the Illinois Ag in the Classroom program directly. You can view their funding opportunities at their Teacher Grants webpage:
